

TV Hearing

Designed to give delightful hearing experience and effortless understanding when listening to media (TV, phone, tablet, computer, car)

Set 860

The Set 860 assistive listening device delivers crystal clear, enhanced sound to users with changing hearing needs. Listening enjoyment is made easy with intuitive features including pre-set hearing profiles, enhanced speech clarity and volume control for each ear. The Set 860 is effortlessly simple to set up and use.

TV Clear Set 1

The TV Clear Set 1 makes it easy to connect to your TV (either with the included TV transmitter or directly via Bluetooth) and to other smart devices like your mobile phone, tablet, computer and more. Enjoy clearer sound, retain awareness of the sounds around you with Ambient Awareness, and benefit from all the convenience of True Wireless earbuds.

TVS 200

The TVS 200 lets you enjoy television and other streamed signals with superior speech clarity and all the comfort and inconspicuous style of True Wireless earbuds. Includes an extended bandwidth Dolby TV transmitter based on a proprietary wireless technology for guaranteed low latency and low power transmission.

Conversation Hearing

Improve hearing in various situations where it can be difficult to distinguish speech over noise

ConC 400

Enjoy crystal-clear conversations with the ConC 400, featuring self-adjusting speech enhancement and active noise cancelling to make words easier to understand, even when challenging noise is present. A True Wireless earbud, they are also great for any stream signal (using Bluetooth), hands-free calling and watching TV.

*ConC 400 is not a hearing aid and not meant to treat hearing loss.

Additional information

Ambient Awareness ▪ Use Ambient Awareness to hear what's happening around you while you use your Sennheiser earbuds.

Tap Control ▪ Multi-function button on the earbud for convenient control

Passive Noise Cancellation ▪ A secure in-ear design & fit minimises external noise for distraction free listening

Active Noise Cancelling ▪ Blocks out noise to make it easier to relax and focus

Automatic Scene Detection ▪ Let speech enhancement match your surroundings with automatic scene detection
▪ Analyses the surrounding and automatically adjusts the Noise Canceller, directional microphones (beamforming) and volume to provide maximum enhancement when in Communication or Streaming mode
▪ In Communication mode the Classifier constantly monitors the environment and automatically adjusts the settings for the best speech understanding

- Quiet: Noise canceller low; microphone beamformer off (= most natural speech)
- Moderate: Noise canceller medium; fixed microphone beamformer (= greatest sensitivity to the front)
- Loud: Noise canceller on; adaptive microphone beamformer (= greatest sensitivity to the front and additional cancellation to the loudest noise source)

Clarity modes ▪ Up to 20 dB high frequency gain for streamed signals

Conversation Clear app ▪ For use with the ConC 400
▪ Simple guided profile setup using embedded sound samples to set preferred volume and clarity
▪ Tailor the performance of your earbuds in the Relax, Communicate, and Stream modes

- Communication mode: see environmental noise level (soft, medium, loud); adjust speech volume; enable Clarity Boost
- Relax mode: general quiet mode
- Streaming mode: balance transition between streaming and ambient volume around you

TV Clear app ▪ For use with the TV Clear and TVS 200
▪ Embedded setup guides
▪ Speech clarity selection, including demo song
▪ Volume control of ambient noise and streamed signal
▪ Configuration of controls, spoken messages etc

Warranty ▪ Global 2-year warranty applies
